MEMORANDUM FOR THE RECORD

TATINTL	FROM : ISAS/Declassification Staff	
	SUBJECT: Conversations with (OC) on Declassification	TATINTL
TATINTL		
	On the afternoon of 26 April, I received a call from OC Declassification Focal Point Officer. He called to inform me that his office had determined that only one small collection of records existed in the Records Center for which they still had oversight. He therefore wanted to know if these records could be reviewed. I said that this would be satisfactory and he therefore said that he would discuss the matter with his colleaques.	
	Upon visiting the AARC, on 27 April, I determined that there were 54 feet of permanent OC records in the Archives (40 of which consisted of a monthly report file, dated from 1948 to 1974) and approximately 700 feet in the Records Center, approximately 260 of which are on permanent retention. Much was not readily identified.	-ATINTI
	An appointment was made with for the afternoon of 28 April. At that time, I discussed the extent of the OC holdings with him, the OC Records Officer and two others. I also discussed the current survey project (and how it differed from a computer list) to identify the informational content of files being conducted in the Archives. I added that the 30 year period was expected to drop to twenty by an Executive Order due in June. In the course of the meeting I emphasized that it was information, not documents, that require declassification action. In his judgement, much of the technical information originated by OC would require continued protection. My comment was that the guidelines should be designed to enable reviewers to identify such material for continued protection. expressed ST the opinion that approval of the OC Records Schedule (changing many files to temporary retention) would vastly simplify the	ATINTI
